

Thermopile Infrared Detectors

# Quad Thermopile TPS 4339

**Four individual thermopiles with different infrared bandpass filters in TO 5 housing for NDIR gas sensing – up to 4 gases possible**

**Thermistor temperature reference included**

**Internal aperture to avoid cross talk**

**Standard gas filter sets for reference, CO, hydrocarbon, CO<sub>2</sub>**

The quad thermopile sensor consists of four single thermopile chips mounted in a TO 5 housing with a thermistor as temperature reference. The window size is 1.5 x 1.5 mm<sup>2</sup> each. Due to the overall small sensor size the construction of a very compact equipment becomes possible.

Applications in automotive exhaust gas control, multiple gas detection for the safety product market or air quality monitoring
