

# PYRODETECTORS FOR GAS MONITORING AND MEASURING

## PYS 3228, PYS 3428 – Dual Channel Pyro

### Applications

- Gas sensing and monitoring

### Features and Benefits

- TO-5 metal housing
- Dual channel output
- Each channel with individual filter window
- Selection of narrow band pass filters
- Thermal compensation option
- EMI protection option

### Product Description

As successor of the LHi 814 series the PYS 3228 dual channel detectors have become standard for gas sensing applications, with two individual elements of size 1.5 x 1.5 and additional temperature compensation. They are available with a range of narrow band pass filters, as specified on page 7 in combination with a reference filter.

The same features are included with the PYS 3428, which offers additional EMI protection by internal capacitors.

All dimensions in mm
