## Chemical resistance of the plastic housing of BG, NG, LG and NS series

•• acetone	••• sodium chloride saturated
••• aluminium acetate	••• sodium sulfate concentrated
○ formic acid concentrated	•• nitrobenzene
••• ammonia	○ oleum
••• ethanoic acid	•• oxalic acid
•• aniline	● ozone
••• benzine	••• perchlorethylene
••• benzene	••• petroleum ether
● benzyl alcohol	● phenol
● bromine	••• potash
••• butane	••• propane
•• butanol	••• pyridine
○ chlorine	○ resorcinol
••• chlorobenzene	••• crude oil
● chloroform	••• salicylic acid
••• diesel oil	○ nitric acid
••• diethyl ether	● nitric acid 1 %
● vinegar	○ nitric acid 10 %
● acetic acid	••• brimstone
••• ethanol	● sulfuric acid 10 %
••• ethylene oxide	○ sulfuric acid concentrated
••• fats	••• hydrosulfide
○ fluorine	••• soap sud
● formaldehyde	••• phenylmethylsilicone fluid
••• difluorodichloromethane liquid F12 - Freon®	••• soda solution 50 %
● difluorodichloromethane liquid F22 - Freon®	••• styrol
● anizifreezing compound	••• oleoresin, turpentine
••• glycerol	••• carbon tetrachloride
● uric acid	••• tetralin / tetrahydronalphtalene
••• urea	••• toluene
••• heptane	••• transformer oil
••• hydraulic oil	● trichlorothane
••• iso-oktanol	● trichlorothylene
○ alcoholic tincture of iodine	••• water
••• caustic potash 50 %	● hydrogen peroxide 20 %
○ potassium permanganate 5 %	••• wine
••• kerosen	● acidity of wine
○ cresol	••• xylene
••• copper sulfate	● zinc chloride
● magnesium chlorid 50 %	● citrid acid
••• sea water	
••• methane	
● methanol	comment
● lactic acid	••• permanent
••• petroleum	● conditionally permanent
••• engine oil	● impermanent
••• sodium carbonate 50 %	○ solubly
